Before Thursday

You're a product builder at InvestorHub. Coming out of Visit 1, we're adding organisations to our CRM.

Jimmy picked up the pitch last week and has built a first version. There's one week left in the cycle. On Thursday you'll meet customer success to get their feedback on it, and before then it's yours to review and fix.

Your job

1. **Read the pitch** the engineer picked up (pages 2 and 3).
2. **Use both versions of the CRM.** They're the two files in this zip, both loaded with Corella Finance's data. Double-click to open them in your browser. Chrome works best.
   - **File 2, Today:** the product before this work.
   - **File 3, Branch:** the engineer's first version.
3. **Bring a one-page plan** covering:
   - what's wrong, missing or done poorly;
   - what you'd fix in the five days left, in order, and why;
   - the questions you want to ask the engineer.

Spend about an hour, and no more than two. You don't need to build anything: the plan is enough. Use any tools you like, including AI.

Anything you change in the CRMs is saved in your browser. "Reset demo data", at the bottom of any page, starts again.

On the day

An hour at our office, with Rhys, Jimmy and Tyler from engineering, and Ryo and Eddy from customer success.

15 MIN	20 MIN	20 MIN	5 MIN
Your plan	**Fix it**	**Feedback**	**Questions**
Talk Jimmy and Rhys through your review. Ask your questions and agree what to fix first.	Make your top fixes in the branch with Jimmy, using Claude on our laptop.	Walk customer success through it, and take their feedback.	Anything you'd like to ask us.

The last pages repeat two exhibits from Visit 1 for reference: Corella's spreadsheet and how our CRM stores data. All people, firms and figures are fictional.

Organisations in the CRM

STATUS	APPETITE	SHAPED BY	PICKED UP BY
In build. End of week 1, one week left	Two weeks, one engineer	Rhys, Head of Product	Jimmy

The problem

Our CRM stores every investor as a person. Fund managers don't work that way. A fund is a team, usually a portfolio manager and one or two analysts, and investor relations teams meet, plan and report by fund.

So clients with institutional investors keep them in a spreadsheet instead. When Corella Finance asked us to load theirs, we couldn't. It's organised by fund manager, with the people and meetings under each one, and our CRM has nowhere to put a fund. A meeting with three people from one fund can only sit on one of them.

Evidence

- Corella's spreadsheet: 27 fund managers, each with its people and meetings. The sales deal was waiting on "can't group people by firm".
- 38 clients have a tag that means "institution", spelled 11 different ways.
- The longest notes in the CRM describe meetings with several people.
- Lost deals: "The CRM can't hold a fund and its people, so we'd keep our spreadsheet." "Can't group analysts and brokers by firm."

The solution

Add **organisations**: a record for a firm that people belong to.

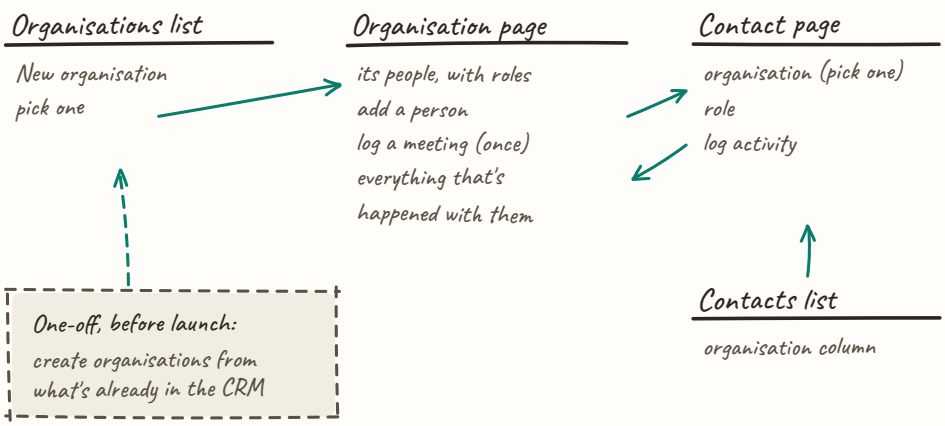

1. **Organisations list.** Every organisation, with its people.
2. **Organisation page.** Its people and their roles, and everything that's happened with them, in one place.
3. **Log a meeting once.** Log a meeting against the organisation, instead of on one person.
4. **Organisation on a contact.** Each person belongs to an organisation. Show it on their page and in the contacts list, and let people change it.
5. **Start with what's there.** Existing clients shouldn't have to set organisations up by hand. Create them from what's already in the CRM.

Done looks like: Josh at Corella opens Larkspur Capital, sees Priya, David and Tom with their roles, and logs the August roadshow meeting once.

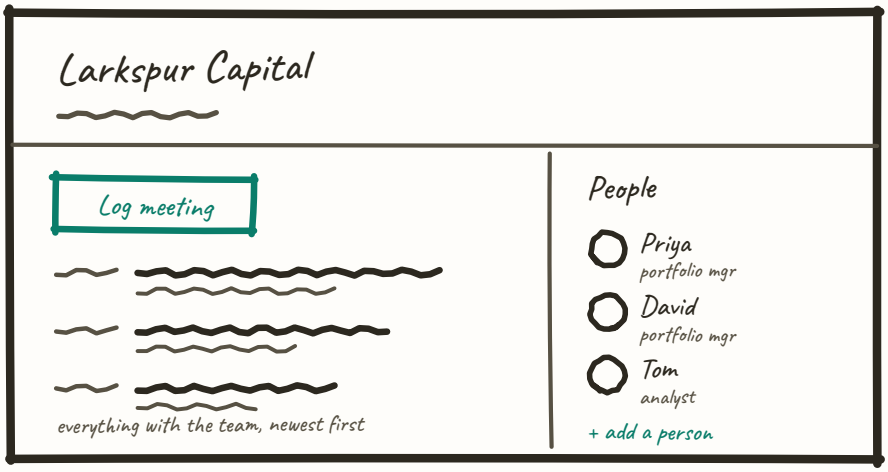

The sketches

Directional only, not a design. They show what connects to what, and roughly what goes on the new page.

HOW THE PLACES CONNECT

THE ORGANISATION PAGE, ROUGHLY

Rabbit holes

- Don't build a full company database: addresses, websites, company numbers. A name is enough for now.
- Don't try to work out who someone works for from their email address.

Left to the engineer

- How existing contacts get their organisation. Decided in week 1.

Not this cycle

- Linking organisations to shareholdings or the ownership report. That's the next bet.
- Reporting on organisations, such as meetings per fund over a year.
- Organisations shared across more than one client company.

With this pitch you get two versions of the CRM, both loaded with Corella's data. **Today** is the CRM before this work. **Branch: organisations** is what Jimmy has built in week 1.

How our CRM stores investors

Simplified. Each client company has its own separate set of contacts. A contact is one person, and **email is the key** that links most data to a contact.

Shareholding

ONE ACCOUNT ON THE SHARE REGISTER

- Holder ID
- Account name and address
- Shares held, and changes

COMES FROM

the share register, synced from the registry. A holding with no matching contact creates a new contact.

MANY → 1

A contact can have several shareholdings. Linked by holder ID, then email

Contact

ONE PERSON, IN ONE CLIENT COMPANY

EMAIL · THE KEY

- Name, phone, address
- Company and occupation: free text
- Tags and lists
- Investor website account, if they signed up

COMES FROM

the register, investor website sign-ups, adding by hand, or the **contact CSV import**: one person per row, linked by email. Rows with no email are dropped. Notes can't be imported.

1 ← MANY

Each entry belongs to one contact

Activity log

A TIMELINE ON EACH CONTACT

- Notes, calls and meetings typed in
- Emails forwarded in
- Emails we sent: opened, clicked, unsubscribed
- Investor website activity

COMES FROM

notes typed on a contact; emails forwarded in, which land on the one contact the email was sent to; our emails; the investor website.

Corella Investor CRM v14.xlsx · sent by Josh (IR manager) to InvestorHub on 14 Oct · extract: 10 of 27 rows on "Funds", 7 of 31 rows on "Roadshow Aug-26"

Josh's email: "Here's our investor CRM. Can you load it into InvestorHub so we can run everything from there? Happy to send the Feb roadshow tab and the broker list too."

Funds | Roadshow Aug-26 | Roadshow Feb-26 | Brokers | Old

	A	B	C	D	E	F	G	H	I
1	Fund manager	Type	Their funds that hold us	% of our shares (June)	Their people	Ours	Last met	Notes	Next step
2	Larkspur Capital	Fund manager	Emerging Leaders; Small Cos	9.0	Priya Raman (manager, Emerging Leaders) / David Okafor (manager, Small Cos) / Tom Avery (analyst, both) / ~~Ella Ng (analyst)~~ moved to Kestrel Jul	Hannah	18-Aug	Priya keen on loan growth. David more cautious: asked about late repayments. May buy more after the raise.	Send David the late-repayments data
3	Meridian Lane AM	Fund manager	Australian Equities	6.7	Daniel Moss (manager) / Rachel Hu (co-manager) / Sarah Kim (analyst)	Hannah	19-Aug	Worried about funding costs. Daniel prefers CFO only; Rachel wants the CEO.	Follow up after Q1
4	Bluegum Partners	Fund manager	Small Caps	4.5	Ash Kumar (manager)	Josh	04-Mar	Lost a big client in Q2. Selling??	Check next ownership report
5	Corbett & Lane	Fund manager	Value Fund	3.0	Peter Corbett (head of investments) / James Wu (analyst)	Hannah	12-Feb	Asked about bad debts.	
6	Kestrel Point Investments	Fund manager	Financials Opportunities	2.6	Mark Ellery (manager, Financials Opps) / Jo Tan (manager, Small Caps, not holding) / Ella Ng (analyst, ex-Larkspur)	Josh	20-Aug	Ella new here. Jo may buy. Wants to visit our operations.	Book visit Nov
7	Seahaven Super	Super fund	Balanced (via external manager?)	1.9	research@seahaven			Holds through a manager. Who?	
8	Atlas Funds Mgmt	Fund manager	not in ownership report	–	Grace Liu (analyst)	Josh	21-Aug	Met at the Sydney conference. Interested in the income angle.	Invite to Feb roadshow
9	Southern Cross Equities	Fund manager	not in ownership report	~0.8 (broker's guess)	Lucy Park (manager)	Josh	20-Aug	Too small to show in the ownership report.	Invite to Feb roadshow
10	Pinnacle Rock Capital	Hedge fund	not in ownership report	?	?? ask Hartley			Betting against us?	
11	Hartley Securities	Broker	–	–	Nick Hale (sales) / Amy Tran (research)	Hannah	22-Aug	Our broker. Books our roadshow meetings. Amy to start writing research on us.	First research in Nov
